No. 1. SERIES 1911—1912

MONTHLY SUMMARY
OF
COMMERCE AND FINANCE
OF THE
UNITED STATES

JULY, 1911

WASHINGTON
GOVERNMENT PRINTING OFFICE
1911

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the customhouse, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The value of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained. The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States." (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products of manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and corn meal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds; Brazil nuts, 62 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

JULY SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for July, 1911, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for July and the seven months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig-iron production; and IX. Ocean freight rates.

The unit of weight used in the Summary of Internal Commerce is either the "long" ton of 2,240 pounds or the "short" ton of 2,000 pounds. The term "net ton" is used exclusively to denote the unit of vessel measurement (100 cubic feet of carrying capacity, exclusive of space occupied by cabins, machinery, etc.).

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Twenty-four different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for July and seven months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

This movement includes receipts and shipments for July and seven months at important interior markets for three successive years. For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business—i. e., quantities actually unloaded at local elevators or warehouses—and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments; in some cities all quantities forwarded or rebilled, even if not unloaded; and in other cities shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that the selection of the same date as the beginning of the crop year for the various grains must be more or less arbitrary, owing to the appreciable difference in time and place of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date marking the beginning of the common crop year.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of July and seven months ending with July. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of July transactions at 161 ports of receipt and 216 ports of shipment were reported. The number of vessels arriving in July was 11,659, and the departures numbered 11,703. The registered tonnage for the month was as follows: Arrivals, 15,780,500 net tons; departures, 15,869,429 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, JULY AND SEVEN MONTHS ENDING JULY, 1909-1911.

A summary of the lake traffic for July, compared with the corresponding months in 1909 and 1910, is given in the following table. The various quantities and units of freight are reduced to their equivalents in short tons. July receipts in 1911 at all ports reporting were 11,090,691 short tons, compared with 12,873,893 short tons in July, 1910, and 11,858,266 short tons in July, 1909. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

¹ Does not include coal supplied to vessels for their own fueling purposes. For particulars regarding quantities of bunker coal supplied to vessels in the domestic trade at lake ports, see page 115.

In the above table Detroit commerce was treated as part of Lake Erie commerce; the Lake Huron figures include all the commerce north of Detroit and south of Sault Ste. Marie.

Merchandise transported between United States points, but passing, under bond, through Canadian territory, is known as "in-transit" movement. That class of tonnage which required the use of the Great Lakes as a link in its journey in July, 1911, consisted of the following: Receipts at Chicago-South Chicago, 8,497 short tons unclassified freight; Conneaut, 220 short tons unclassified freight; and Milwaukee, 3,384 short tons unclassified freight. Shipments from Chicago-South Chicago, 126 short tons flour, 1,143,302 bushels corn, 109,681 bushels oats, and 1,553 short tons unclassified freight; Conneaut, 119 short tons iron manufactures, and 29 short tons soft coal; Duluth, 21,000 bushels wheat; and Superior-West Superior, 9,000 bushels wheat and 125,718 bushels oats.

The total "in-transit" movement for July was 119 short tons iron manufactures, 29 short tons soft coal, 126 short tons flour, 30,000 bushels wheat, 1,143,302 bushels corn, 235,399 bushels oats, and 13,654 short tons unclassified freight.

During July, 1911, there were inspected into vessels at Chicago, as reported by the State grain inspector, 10,165,161 bushels of grain, composed of 2,570,998 bushels wheat, 5,683,448 bushels corn, and 1,910,715 bushels oats. During July, 1910, there were inspected 5,546,015 bushels of grain, composed of 829,380 bushels wheat, 4,311,517 bushels corn, and 405,118 bushels oats.

During the season ending July 31, 1911, the total quantity of grain inspected before loading into vessels was 34,336,046 bushels, as compared with 18,244,458 bushels during the same period in 1910.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets during July and seven months ending July, 1909, 1910, and 1911. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented.

COASTWISE RECEIPTS OF LUMBER IN CARGO LOTS AT NEW YORK.

Receipts of southern pine lumber at New York from the ports mentioned above for the period December 25, 1910, to July 25, 1911, amounted to 233,667,352 feet, of which 109,207,821 feet came by sail, in 244 cargoes, and 124,459,531 feet by steam. During the same period in 1910, 289,330,776 feet were received, of which 130,614,686 feet came by sail, in 282 cargoes, and 158,716,090 feet by steam.

Eastern spruce received, mainly from New England ports, for the period December 25, 1910, to July 25, 1911, included 62 cargoes of laths, 85 cargoes of lumber, 26 cargoes of piling, making a total of 173 cargoes. For the same period in 1910, 66 cargoes of laths, 138 cargoes of lumber, and 34 cargoes of piling were received, or a total of 238 cargoes.

Miscellaneous receipts of lumber at New York for the period between December 25, 1910, and July 25, 1911, from the South included the following additional varieties: Box material, 110,660 bundles; cedar, 800 cubic feet; cedar logs, 1,218 cars; cedar planks, 1,386 pieces; cedar slats, 480 bundles, 4,357 cases, and 13,743 sacks; crate material, 73,094 bundles, 4 cases, and 6,670 packages; hickory, 863 bundles and 11 cars; laths, 1 car; lumber, 333 cars, 500 cubic feet, 5,002,857 feet, and 6,582 pieces; piling, 3,591 pieces; shingles, 16,603 bundles and 705,673 pieces; ties, 34,301,317 feet and 1,989,613 pieces; wood paving, 459,000 feet.

For the same period in 1910 there were received from December 25, 1909, to July 25, 1910, the following additional varieties: Box material, 104,639 bundles and 2 cars; cedar, 585 sacks; cedar logs, 1 car and 1,569 pieces; cedar planks, 1,461 pieces; cedar slats, 504 bundles, 1,681 cases, 1 car, 602 packages, and 1,430 sacks; crate material, 11,175 bundles and 6 cars; hardwood, 1 car; hickory, 4 cars; holly logs, 113 pieces; laths, 12,025 bundles; lumber, 3,952 bundles, 505 cars, 5,460,000 feet, 677 crates (thin), 1,150 cubic feet, and 12,729 pieces; pencil slats, 2 cars, 50 cases, and 3,009 packages; piling, 50,635 linear feet, 2,616 pieces; shingles, 52,919 bundles, 13 cars, and 1,951,925 pieces; shooks, 9,444 bundles; ties, 41,930,342 feet and 2,513,608 pieces.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, the following figures of the coastwise coal movements have been obtained. These statistics cover probably more than 90 per cent of the shipments at the places and for the periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and, to a small extent only, anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. The figures given include domestic shipments by water proper, as well as amounts of bunker coal supplied to vessels in the domestic and foreign trades. In the case of New York the figures include, also, the quantities of anthracite and bituminous coal shipped across the river for local consumption in Greater New York and vicinity. No account is taken of the quantities of coal transported by float to railroad terminals.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio Rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years to the end of July. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac Rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

The New Orleans Cotton Exchange does not publish any summary of July returns of sight receipts, port receipts, overland movement, and distribution of cotton. For this reason the usual monthly statement, based upon these returns, does not appear in this issue.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; lumber shipments from the Pacific Northwest States and from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburgh, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi Rivers; the traffic movements on New York State canals; and the Delaware & Chesapeake Canal, connecting the Chesapeake and Delaware Bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

The maximum tonnage on the Big Sandy River for July, 1911, was at Lock No. 1, where 2,625 short tons of freight passed.

The maximum tonnage on the Black Warrior River for July, 1911, was at Lock No. 5, where 7,890 short tons of freight passed.

The maximum tonnage on the Coosa River for July, 1911, was at Lock No. 3, where 70 short tons of freight passed.

The maximum tonnage on the Cumberland River for July, 1911, was at Lock No. 2, where 8,448 short tons of freight passed.

Upstream tonnage on the Kentucky River during July, 1911, was largest at Lock No. 1, where 14,211 short tons of freight passed, of which 13,800 short tons were coal and 411 short tons were miscellaneous merchandise. Downstream tonnage at Lock No. 10 aggregated 14,212 short tons of miscellaneous freight. The grand total freight passing in both directions at locks of maximum tonnage was 28,423 short tons.

Upstream tonnage on the Muskingum River during July, 1911, was largest at Lock No. 10, where 2,953 short tons of freight passed, of which 2,814 short tons were coal and 139 short tons were miscellaneous merchandise. Downstream tonnage was largest at Lock No. 10, where 3,346 short tons of freight passed. The grand total freight passing in both directions at locks of maximum tonnage was 6,299 short tons.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For seven months ending with July, 1911, of the vessels reported 1,477 were loaded with coal; 230 with lumber, logs, piling, and wood; 75 with ties; 248 with merchandise; 3 with molasses and sugar; 60 with corn; 24 with wheat; 27 with brick; 9 with iron and steel; 5 with bridge material; 21 with wire and nails; and 27 with rock.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 32,792 short tons mined in the first and second pools, makes a total coal traffic of 485,792 short tons. This total, plus 6,283 short tons of miscellaneous merchandise which passed through Lock No. 3 during the month represents approximately the general aggregate of downstream traffic during July, 1911—492,075 short tons.

The total freight moved in both directions, on this basis of calculation, was 638,814 short tons in July, 1911, as against 992,507 short tons in July, 1910, and 838,150 short tons in July, 1909.

For seven months ending with July the total movement was 6,442,740 short tons in 1911, 6,562,048 short tons in 1910, and 6,835,853 short tons in 1909. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The upstream freight passing Lock No. 1 for seven months ending July amounted to 752,852 short tons.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburgh and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore & Ohio Railroad, the Chesapeake & Ohio Railway, the Norfolk & Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima, Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

PRODUCTION AND SHIPMENT OF CONNELLSVILLE (PA.) COKE.

The following table presents figures of production and shipments of Connellsville coke from Connellsville proper and the so-called Lower District, as reported in the weekly issues of the Connellsville Courier. The figures represent estimates of the Courier verified by and combined with the actual tonnage figures of the local railways.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude oil from southeastern Ohio and Lima-Indiana crude oil from northwestern Ohio; the Indiana Pipe Line Co., which receives crude oil from Indiana and Illinois, and the Prairie Oil & Gas Co., which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude oil, and its Lima-Indiana crude oil was reported jointly with that of the Indiana pipe line. Also, prior to that date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Not stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and for which they are liable. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

IX.—OCEAN FREIGHT RATES.

The monthly range in ocean freight rates on staple products, for comparative periods of two years, between important Atlantic and Gulf ports and Europe, is shown in tables for Boston, New York, Baltimore, and New Orleans. In the Baltimore table, unless otherwise specified, rates in the United States currency are in cents per 100 pounds, and those in English sterling per long tons of 2,240 pounds.

BUREAU OF STATISTICS

O. P. AUSTIN, CHIEF OF BUREAU

No. 2. SERIES 1911—1912

MONTHLY SUMMARY
OF
COMMERCE AND FINANCE
OF THE
UNITED STATES

AUGUST, 1911

WASHINGTON
GOVERNMENT PRINTING OFFICE

1911

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the customhouse, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties *ad valorem* are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties *ad valorem* are ascertained. The value of merchandise imported since August 5, 1909, subject to *ad valorem* rates of duty and duty imposed upon and regulated in any manner by the value thereof shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States. (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products of manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and corn meal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

SUMMARY OF SHIPMENTS OF DOMESTIC MERCHANDISE TO NONCONTIGUOUS TERRITORIES.

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

AUGUST SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for August, 1911, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for August and the eight months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig-iron production; and IX. Ocean freight rates.

The unit of weight used in the Summary of Internal Commerce is either the "long" ton of 2,240 pounds or the "short" ton of 2,000 pounds. The term "net ton" is used exclusively to denote the unit of vessel measurement (100 cubic feet of carrying capacity, exclusive of space occupied by cabins, machinery, etc.).

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Twenty-four different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for August and eight months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

This movement includes receipts and shipments for August and eight months at important interior markets for three successive years. For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business—i. e., quantities actually unloaded at local elevators or warehouses—and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments; in some cities all quantities forwarded or rebilled, even if not unloaded; and in other cities shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that the selection of the same date as the beginning of the crop year for the various grains must be more or less arbitrary, owing to the appreciable difference in time and place of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date marking the beginning of the common crop year.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of August and eight months ending with August. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of August transactions at 155 ports of receipt and 212 ports of shipment were reported. The number of vessels arriving in August was 12,246, and the departures numbered 12,290. The registered tonnage for the month was as follows: Arrivals, 16,248,910 net tons; departures, 16,283,567 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC AUGUST AND EIGHT MONTHS ENDING AUGUST, 1909-1911.

A summary of the lake traffic for August, compared with the corresponding months in 1909 and 1910, is given in the following table. The various quantities and units of freight are reduced to their equivalents in short tons. August receipts in 1911 at all ports reporting were 11,373,948 short tons, compared with 12,701,259 short tons in August, 1910, and 12,281,627 short tons in August, 1909. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

1 Does not include coal supplied to vessels for their own fueling purposes. For particulars regarding quantities of bunker coal supplied to vessels in the domestic trade at lake ports, see page 275.

In the above table Detroit commerce was treated as part of Lake Erie commerce; the Lake Huron figures include all the commerce north of Detroit and south of Sault Ste. Marie.

Merchandise transported between United States points, but passing, under bond, through Canadian territory, is known as "in-transit" movement. That class of tonnage which required the use of the Great Lakes as a link in its journey in August, 1911, consisted of the following: Receipts at Chicago-South Chicago, 6,656 short tons unclassified freight; Conneaut, 1,382 short tons unclassified freight; and Milwaukee, 2,198 short tons unclassified freight. Shipments from Ashtabula, 42 short tons unclassified freight; Chicago-South Chicago, 18 short tons iron manufactures, 165 short tons flour, 305,897 bushels wheat, 473,600 bushels corn, 1,890,441 bushels oats, and 1,154 short tons unclassified freight; Conneaut, 106 short tons iron manufactures, 56 short tons soft coal, and 29 short tons unclassified freight.

The total "in-transit" movement for August was 124 short tons iron manufactures, 56 short tons soft coal, 165 short tons flour, 305,897 bushels wheat, 473,600 bushels corn, 1,890,441 bushels oats, and 11,461 short tons unclassified freight.

During August, 1911, there were inspected into vessels at Chicago, as reported by the State grain inspector, 15,323,866 bushels of grain, composed of 5,846,885 bushels wheat, 4,649,981 bushels corn, and 4,827,000 bushels oats. During August, 1910, there were inspected 9,158,798 bushels of grain, composed of 2,986,727 bushels wheat, 4,888,101 bushels corn, and 1,283,970 bushels oats.

During the season ending August 31, 1911, the total quantity of grain inspected before loading into vessels was 49,659,912 bushels, as compared with 27,403,256 bushels during the same period in 1910.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets during August and eight months ending August, 1909, 1910, and 1911. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

COASTWISE RECEIPTS OF LUMBER IN CARGO LOTS AT NEW YORK.

Receipts of southern pine lumber at New York from the ports mentioned above for the period December 25, 1910, to August 25, 1911, amounted to 266,616,979 feet, of which 123,652,735 feet came by sail, in 277 cargoes, and 142,964,244 feet by steam. During the same period in 1910, 329,284,862 feet were received, of which 148,580,191 feet came by sail, in 321 cargoes, and 180,704,671 feet by steam.

Eastern spruce received, mainly from New England ports, for the period December 25, 1910, to August 25, 1911, included 76 cargoes of laths, 110 cargoes of lumber, 39 cargoes of piling, making a total of 225 cargoes. For the same period in 1910, 90 cargoes of laths, 186 cargoes of lumber, and 50 cargoes of piling were received, or a total of 326 cargoes.

Miscellaneous receipts of lumber at New York for the period between December 25, 1910, and August 25, 1911, from the South included the following additional varieties: Box material, 124,180 bundles; cedar, 1,500 cubic feet; cedar logs, 1,752 cars; cedar planks, 1,386 pieces; cedar slats, 480 bundles, 4,804 cases, and 14,941 sacks; crate material, 79,301 bundles, 4 cases, 8,770 packages, and 1,367 sacks; hickory, 863 bundles and 11 cars; laths, 1 car; lumber, 423 cars, 500 cubic feet, 5,002,857 feet, and 6,582 pieces; piling, 3,591 pieces; shingles, 18,663 bundles and 770,980 pieces; ties, 36,641,688 feet and 2,099,291 pieces; wood paving, 459,000 feet.

For the same period in 1910 there were received from December 25, 1909, to August 25, 1910, the following additional varieties: Box material, 119,426 bundles and 4 cars; cedar, 1,350 cubic feet and 585 sacks; cedar logs, 1 car and 1,652 pieces; cedar planks, 2,319 pieces; cedar slats, 504 bundles, 3 cars, 1,841 cases, 602 packages, and 1,988 sacks; crate material, 13,680 bundles and 6 cars; hardwood, 1 car; hickory, 4 cars; holly logs, 1 car and 113 pieces; laths, 12,025 bundles; lumber, 3,952 bundles, 600 cars, 5,460,000 feet, 677 crates (thin), 1,150 cubic feet, and 12,729 pieces; pencil slats, 2 cars, 50 cases, and 3,009 packages; piling, 90,635 linear feet and 2,616 pieces; shingles, 66,279 bundles, 18 cars, and 2,006,925 pieces; shooks, 9,444 bundles; ties, 51,174,512 feet and 2,778,042 pieces.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, the following figures of the coastwise coal movements have been obtained. These statistics cover probably more than 90 per cent of the shipments at the places and for the periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and, to a small extent only, anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. The figures given include domestic shipments by water proper, as well as amounts of bunker coal supplied to vessels in the domestic and foreign trades. In the case of New York the figures include also the quantities of anthracite and bituminous coal shipped across the river for local consumption in Greater New York and vicinity. No account is taken of the quantities of coal transported by float to railroad terminals.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years to the end of August. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock; Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; lumber shipments from the Pacific Northwest States and from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburgh, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi Rivers; the traffic movements on New York State canals; and the Delaware & Chesapeake Canal, connecting the Chesapeake and Delaware Bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 30,293 short tons mined in the first and second pools, makes a total coal traffic of 555,493 short tons. This total, plus 8,283 short tons of miscellaneous merchandise which passed through Lock No. 3 during the month represents approximately the general aggregate of downstream traffic during August, 1911—563,776 short tons.

The total freight moved in both directions, on this basis of calculation, was 705,797 short tons in August, 1911, as against 898,841 short tons in August, 1910, and 831,736 short tons in August, 1909.

For eight months ending with August the total movement was 7,148,537 short tons in 1911, 7,460,889 short tons in 1910, and 7,667,589 short tons in 1909. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The upstream freight passing Lock No. 1 for eight months ending August amounted to 894,873 short tons.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For eight months ending with August, 1911, of the vessels reported 1,480 were loaded with coal; 246 with lumber, logs, piling, and wood; 75 with ties; 302 with merchandise; 4 with molasses and sugar; 60 with corn; 42 with wheat; 27 with brick; 9 with iron and steel; 5 with bridge material; 21 with wire and nails; and 38 with rock.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburgh and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore & Ohio Railroad, the Chesapeake & Ohio Railway, the Norfolk & Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima, Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude oil from southeastern Ohio and Lima-Indiana crude oil from northwestern Ohio; the Indiana Pipe Line Co., which receives crude oil from Indiana and Illinois, and the Prairie Oil & Gas Co., which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude oil, and its Lima-Indiana crude oil was reported jointly with that of the Indiana pipe line. Also, prior to that date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and for which they are liable. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

IX.—OCEAN FREIGHT RATES.

The monthly range in ocean freight rates on staple products, for comparative periods of two years, between important Atlantic and Gulf ports and Europe, is shown in tables for Boston, New York, Baltimore, and New Orleans. In the Baltimore table, unless otherwise specified, rates in the United States currency are in cents per 100 pounds, and those in English sterling per long tons of 2,240 pounds.

¹² Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about \$25,000,000, and this

estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

¹³ As the result of a special investigation by the Director of the Mint, a reduction of \$135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on Sept. 1, 1910, a reduction of \$9,700,000 was made in the estimate of subsidiary silver.

¹⁴ Includes notes of Bank of United States; State-bank notes; demand notes of 1862 and 1863; fractional currency, 1863 to 1878; Treasury notes of 1890, 1891 to date; and currency certificates, act of June 8, 1872, 1892 to 1900.

¹⁵ Individual and other.

¹⁶ Data of the Department of Agriculture, representing wealth production on farms. Figures for 1910 include products fed to live stock.

¹⁷ 1904. Exclusive of neighborhood industries and hand trades, included in previous years.

DEPARTMENT OF COMMERCE AND LABOR

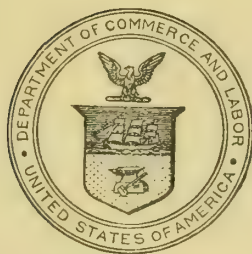

BUREAU OF STATISTICS

O. P. AUSTIN, CHIEF OF BUREAU

No. 3. SERIES 1911-1912

MONTHLY SUMMARY
OF
COMMERCE AND FINANCE
OF THE
UNITED STATES

SEPTEMBER, 1911

WASHINGTON
GOVERNMENT PRINTING OFFICE
1911

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the customhouse, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained. The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States." (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products of manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and corn meal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

SEPTEMBER SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for September, 1911, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for September and the nine months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig-iron production; and IX. Ocean freight rates.

The unit of weight used in the Summary of Internal Commerce is either the "long" ton of 2,240 pounds or the "short" ton of 2,000 pounds. The term "net ton" is used exclusively to denote the unit of vessel measurement (100 cubic feet of carrying capacity, exclusive of space occupied by cabins, machinery, etc.).

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Twenty-four different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for September and nine months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

This movement includes receipts and shipments for September and nine months at important interior markets for three successive years. For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business—i. e., quantities actually unloaded at local elevators or warehouses—and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments; in some cities all quantities forwarded or rebilled, even if not unloaded; and in other cities shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of September and nine months ending with September. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of September transactions at 167 ports of receipt and 217 ports of shipment were reported. The number of vessels arriving in September was 10,248, and the departures numbered 10,158. The registered tonnage for the month was as follows: Arrivals, 14,071,776 net tons; departures, 14,025,808 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC SEPTEMBER AND NINE MONTHS ENDING SEPTEMBER, 1909-1911.

A summary of the lake traffic for September, compared with the corresponding months in 1909 and 1910, is given in the following table. The various quantities and units of freight are reduced to their equivalents in short tons. September receipts in 1911 at all ports reporting were 10,385,088 short tons, compared with 11,354,639 short tons in September, 1910, and 12,134,702 short tons in September, 1909. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

¹ Does not include coal supplied to vessels for their own fueling purposes. For particulars regarding quantities of bunker coal supplied to vessels in the domestic trade at lake ports, see page 440.

In the above table Detroit commerce was treated as part of Lake Erie commerce; the Lake Huron figures include all the commerce north of Detroit and south of Sault Ste. Marie.

Merchandise transported between United States points, but passing, under bond, through Canadian territory, is known as "in-transit" movement. That class of tonnage which required the use of the Great Lakes as a link in its journey in September, 1911, consisted of the following: Receipts at Chicago-South Chicago, 7,045 short tons unclassified freight; Conneaut, 1,207 short tons unclassified freight; and Milwaukee, 3,186 short tons unclassified freight. Shipments from Ashtabula, 1 short ton flour, 630 bushels oats, and 28 short tons unclassified freight; Chicago-South Chicago, 150 short tons flour, 1,201,736 bushels corn, 1,270,169 bushels oats, and 1,559 short tons unclassified freight; Conneaut, 143 short tons iron manufactures, 31 short tons soft coal, and 54 short tons unclassified freight.

The total "in-transit" movement for September was 143 short tons iron manufactures, 31 short tons soft coal, 151 short tons flour, 1,201,736 bushels corn, 1,270,799 bushels oats, and 13,079 short tons unclassified freight.

During September, 1911, there were inspected into vessels at Chicago, as reported by the State grain inspector, 14,516,473 bushels of grain, composed of 3,009,005 bushels wheat, 8,613,300 bushels corn, and 2,894,168 bushels oats. During September, 1910, there were inspected 13,642,712 bushels of grain, composed of 1,537,424 bushels wheat, 9,067,333 bushels corn, and 3,037,955 bushels oats.

During the season ending September 30, 1911, the total quantity of grain inspected before loading into vessels was 64,176,385 bushels, as compared with 41,045,968 bushels during the same period in 1910.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets during September and nine months ending September, 1909, 1910, and 1911. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, the following figures of the coastwise coal movements have been obtained. These statistics cover probably more than 90 per cent of the shipments at the places and for the periods mentioned and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and, to a small extent only, anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. The figures given include domestic shipments by water proper, as well as amounts of bunker coal supplied to vessels in the domestic and foreign trades. In the case of New York the figures include also the quantities of anthracite and bituminous coal shipped across the river for local consumption in Greater New York and vicinity. No account is taken of the quantities of coal transported by float to railroad terminals.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years to the end of September. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

Receipts of live stock at New Orleans for four weeks ending September 27 amounted to 12,957 head, of which 10,892 were cattle, 1,336 hogs; 418 sheep, and 311 milch cows. Arrivals for a similar month in 1910 totaled 16,273 head, divided into 14,542 cattle, 1,057 hogs, 257 sheep, and 417 milch cows. Arrivals for a similar month in 1909 totaled 17,327 head, divided into 16,230 cattle, 405 hogs; 115 sheep, and 577 milch cows.

For 39 weeks ending September 27 arrivals of live stock at New Orleans reached a total of 135,344 head, in contrast with 143,483 head for a like period in 1910 and 152,899 head for a like period in 1909. Of the present year's total, cattle constituted 107,732 head, hogs, 22,767 head, sheep 2,695 head, and milch cows 2,150 head, while a corresponding movement for last year amounted to 118,826 cattle, 19,740 hogs, 2,370 sheep, and 2,547 milch cows, and for 1909, 131,590 cattle, 16,242 hogs, 1,993 sheep, and 3,074 milch cows.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; lumber shipments from the Pacific Northwest States and from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

COMMERCIAL MOVEMENTS AT PORTLAND, OREG.

The following tables show the domestic and foreign shipments of lumber and grain by water from Portland, and the domestic receipts and shipments of various articles by water during the month of September, 1911. Vessel departures at this port during the month numbered 91, of 111,065 net tons registry, compared with 73 vessels, of 85,737 net tons, for September, 1910. Arrivals for the same month were 101 vessels, of 127,231 net tons, in 1911, and 82 vessels, of 101,202 net tons, in 1910.

SHIPMENTS OF LUMBER FROM PACIFIC NORTHWEST.

The number of mills reported should be taken account of in connection with the figures in the following table. During the nine months ending September the average number was 54 in 1910 and 39 in 1911, or 15 less in 1911 than in 1910.

Shipments of pine from the Pacific Northwest during nine months ending September, 1911, amounted to 21,259 cars, and were distributed as follows: Local, 8,749 cars; North Dakota, 1,133 cars; South Dakota, 1,649 cars; Minnesota, 881 cars; Wisconsin, 1,163 cars; Iowa, 1,292 cars; Illinois, 934 cars; Kansas, 86 cars; Nebraska, 1,164 cars; Missouri, 41 cars; Colorado, 732 cars; Wyoming, 244 cars; Utah, 625 cars; Michigan, 181 cars; Ohio, 91 cars; Indiana, 99 cars; Atlantic Coast States, 501 cars; other Eastern States, 397 cars; Canada, 1,288 cars; Nevada, 7 cars; California, 1 car; Texas, 1 car.

During the corresponding period in 1910 the shipments amounted to 28,177 cars, which were distributed as follows: Local, 12,817 cars; North Dakota, 2,314 cars; South Dakota, 2,929 cars; Minnesota, 780 cars; Wisconsin, 1,683 cars; Iowa, 1,021 cars; Illinois, 899 cars; Kansas, 136 cars; Nebraska, 2,195 cars; Missouri, 44 cars; Colorado, 935 cars; Wyoming, 464 cars; Utah, 788 cars; Michigan, 90 cars; Ohio, 69 cars; Indiana, 43 cars; Atlantic Coast States, 191 cars; other Eastern States, 190 cars; Canada, 456 cars; Nevada, 2 cars; California, 13 cars; Oklahoma, 1 car; not specified, 164 cars.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburgh, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi Rivers; the traffic movements on New York State canals; and the Delaware & Chesapeake Canal, connecting the Chesapeake and Delaware Bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

The maximum tonnage on the Black Warrior River for September, 1911, was at Lock No. 5, where 3,254 short tons of freight passed, of which 3 short tons were coal and 3,251 short tons were miscellaneous merchandise.

The maximum tonnage on the Coosa River for September, 1911, was at Lock No. 3, where 30 short tons of freight passed.

The maximum tonnage on the Cumberland River for September, 1911, was at Lock No. 2, where 2,994 short tons of freight passed.

Upstream tonnage on the Kentucky River during September, 1911, was largest at Lock No. 2, where 9,324 short tons of freight passed, of which 8,925 short tons were coal and 399 short tons were miscellaneous merchandise. Downstream tonnage at Lock No. 12 aggregated 8,279 short tons of miscellaneous freight. The grand total freight passing in both directions at locks of maximum tonnage was 17,603 short tons.

Upstream tonnage on the Muskingum River during September, 1911, was largest at Lock No. 10, where 1,552 short tons of freight passed, of which 73 short tons were coal and 1,479 short tons were miscellaneous merchandise. Downstream tonnage was largest at Lock No. 10, where 2,444 short tons of freight passed. The grand total freight passing in both directions at locks of maximum tonnage was 3,996 short tons.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For nine months ending with September, 1911, of the vessels reported 1,982 were loaded with coal; 261 with lumber, logs, piling, and wood; 75 with ties; 360 with merchandise; 4 with molasses and sugar; 60 with corn; 42 with wheat; 27 with brick; 12 with iron and steel; 5 with bridge material; 21 with wire and nails; and 50 with rock.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 22,145 short tons mined in the first and second pools, makes a total coal traffic of 610,345 short tons. This total, plus 11,723 short tons of miscellaneous merchandise which passed through Lock No. 3 during the month, represents approximately the general aggregate of downstream traffic during September, 1911—622,068 short tons.

The total freight moved in both directions, on this basis of calculation, was 757,565 short tons in September, 1911, as against 901,279 short tons in September, 1910, and 869,927 short tons in September, 1909.

For nine months ending with September the total movement was 7,906,102 short tons in 1911, 8,362,168 short tons in 1910, and 8,537,516 short tons in 1909. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The upstream freight passing Lock No. 1 for nine months ending September amounted to 1,030,370 short tons.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburgh and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore & Ohio Railroad, the Chesapeake & Ohio Railway, the Norfolk & Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima, Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude oil from southeastern Ohio and Lima-Indiana crude oil from northwestern Ohio; the Indiana Pipe Line Co., which receives crude oil from Indiana and Illinois; and the Prairie Oil & Gas Co., which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude oil, and its Lima-Indiana crude oil was reported jointly with that of the Indiana pipe line. Also, prior to that date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and for which they are liable. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

IX.—OCEAN FREIGHT RATES.

The monthly range in ocean freight rates on staple products, for comparative periods of two years, between important Atlantic and Gulf ports and Europe, is shown in tables for Boston, New York, Baltimore, and New Orleans. In the Baltimore table, unless otherwise specified, rates in the United States currency are in cents per 100 pounds and those in English sterling per long tons of 2,240 pounds.

¹ The figures of the latest year are largely preliminary and subject to correction.² Residence of Alaska and islands belonging to the United States.³ Census figures, relating to Continental United States; the figures for 1910 and

1911 represent estimates.

⁴ Census figures.⁵ The calculation of real and personal property.⁶ 1904.⁷ 1791 to 1840, outstanding principal of the public debt, Jan. 1.⁸ 1791.⁹ Figures for the years 1791 to 1859 include the total public debt.¹⁰ 1791 (34 months).¹¹ 1791-1795.¹² Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about \$25,000,000, and this

estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

¹³ As the result of a special investigation by the Director of the Mint, a reduction of \$135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on Sept. 1, 1910, a reduction of \$9,700,000 was made in the estimate of subsidiary silver.¹⁴ Includes notes of Bank of United States; State-bank notes; demand notes of 1862 and 1863; fractional currency, 1863 to 1878; Treasury notes of 1890, 1891 to date; and currency certificates, act of June 8, 1872, 1892 to 1900.¹⁵ Individual and other.¹⁶ Data of the Department of Agriculture, representing wealth production on farms. Figures for 1910 include products fed to live stock.¹⁷ 1904. Exclusive of neighborhood industries and hand trades, included in previous years.
